

December 2, 2011

Dear Beck Lake Dog Friendly Area Permit Holder,

The administrator of the Cook County Animal & Rabies Control has informed us that all dogs that use a dog park should be additionally vaccinated for LEPTOSPIROSIS. This virus is unlike other viruses. It can be transmitted from dogs to humans.

This notification is strictly informative and not required at this time, it will be required in future years.

Please do not hesitate to contact me should you have any questions or concerns.

Thank you,

Dennis Magee
Administrative Assistant
Recreation, Volunteer Resources & Permits
Forest Preserve District of Cook County
